

## Maintenance and Care Instructions for the Ferro Collection

To prolong the life of your Ferro tables, we recommend the following maintenance and care:

The metal surface does not require any special maintenance apart from general periodic cleaning. A damp cloth or duster should be more than sufficient. Avoid abrasive materials as these will scratch the coating.

Sharp objects can score the surface of your furniture. Therefore, avoid placing hot dishes or cups on the surface, always use an insulated mat for protection.

If the metal comes into contact with any water or liquids it should be immediately dried to avoid any potential damage to the lacquer finish.

We recommend that all drinks and products that can cause staining such as oils, preserves, tea, coffee etc. are placed on protective table mats

### Cleaning Instructions

Do not apply any chemicals as this could dull or even damage the finish.

Spills should be removed immediately using a slightly damp cloth and then cleaned using a dry one.

**Our products are classed as 'Vintage Industrial' inspired and so a few imperfections such as blemishes in the top add to the look and are a simply a characteristic of the product.**
